EXPERIENCE

Sep 2022 – Now
Senior Web3 Engineer at Roll

- Made an open-source company-wide set of packages to reduce code duplication & ease cross-product updates.
- Migrated all existing repositories into a new private company mono-repository to increase code sharing.
- Led a Web3 initiative to vest social tokens using a UI interface.
- Created a generic interface to withdraw coins to any ETH address.

Jan 2022 – Jan 2023
Senior Software Engineer at Klarna

- Created a Google Sheet plugin to automate release-candidate testing.
- Designed screens to interact with digital wallets (Apple, Google, Samsung) & Visa campaigns
- Led an initiative to make a shared onboarding library used by multiple teams.
- Held the Siri Shortcuts feature from an idea to a working use case in the Klarna iOS application.

Sep 2020 – Dec 2021
Senior Frontend Engineer at Toptal

- Supported and extended the library of shared components.
- Performed migration from Jenkins to GitHub actions.
- Participated in front-end architecture design and modularity investigations.
- Designed a mentorship program for Monorepo Strategy and successfully mentored five engineers.

Feb 2019 – Sep 2020
Frontend Engineer at Clubhouse (currently Shortcut)

- Implemented new landing pages for the marketing site using GatsbyJS.
- Set up auto-generating types from GraphQL schemes.
- Improved page switching performance by 2 times by moving to code splitting.

Jun 2018 – Jan 2019
Frontend Engineer at weffect

- Designed CSS animation from simple transitions to complex GIF-based animations.
- Set up international support for up to 20 languages.
- Covered 95% with unit and snapshot tests.

Oct 2016 – May 2018
Software Engineer at Attractor Software

- Optimized an existing front-end application runtime performance and start-up speed.
- Created a browser extension for scrapping, analyzing, and representing the data.
