SUMMARY

I design and deploy high-impact systems built on LLMs, local inference, and agent architectures, working close to real problems and shipping production solutions that move core metrics.

WORK EXPERIENCE

Member of Technical Staff

Speechify 2025 - Now

- Scaled LLM translation engine from 20 to 43 locales across 10,000 pages, tripling non-English search clicks.
- Lifted international revenue 2x YoY after unifying translation across website, web app, mobile, and payments.
- Shipped flow-based video pipeline service (0-1), doubling international creative output.

Senior Frontend Engineer

Form 2022 - 2025

- Launched 5 Web3 applications, scaling to 100k+ users with reliable blockchain integrations.
- Built and led an open-source package ecosystem, reducing code duplication and improving team efficiency by 30%.
- Led migration to a monorepo, improving collaboration and cutting build times by 25% while streamlining CI/CD.

Senior Software Engineer

Klarna 2022 - 2023

- Launched React Native onboarding library used by 3+ teams, cutting onboarding time by 40%.
- Integrated intent-aware Siri Shortcuts into the Klarna app, boosting return-to-app rate by 10%.
- Created an automated testing Google Sheets plugin, reducing manual testing hours by 50%.

Senior Frontend Engineer

Toptal 2020 - 2021

- Scaled a shared component system, cutting UI development time by 50% across products.
- Led CI/CD migration from Jenkins to GitHub Actions, accelerating deployments by 30%.
- Mentored 10+ engineers on monorepo architecture, improving delivery efficiency by 25%.

Frontend Engineer

Clubhouse (currently Shortcut) 2019 - 2020

- Doubled page navigation speed via strategic code splitting, improving usability and session duration.
- Led migration from jQuery to React, modernizing the architecture and reducing maintenance effort by 40%.
- Built a CMS-powered landing page enabling no-code marketing updates and increasing lead conversion by 12%.

Frontend Engineer

Weffect 2018 - 2019

- Cut paint time by 25% by migrating animations from CSS/JS to WebGL.
- Guarded the app with integration tests, increasing UI uptime and reducing production incidents by 40%.

Software Engineer

Attractor Software 2016 - 2018

- Doubled site performance, cutting load time to 2s and increasing conversions by 15%.
- Built a browser extension to detect live report errors, improving data accuracy and productivity by 40%.

EDUCATION

Bachelor's Degree in Computer Science

Ala-too Internatinal University 2015 - 2019

SKILLS

JavaScript, TypeScript, CI/CD, Docker, React, GraphQL, Go, LangGraph, GPT, Claude, Rust, Agent Development Kit

RECOGNITION

- Creator of BlazeDiff, a state-of-the-art image diffing engine achieving **industry-leading performance**.
- Published 12 technical articles earning HackerNoon **Top Story** Badge, **2x The TechBeat Top 20**, Toptal **Verified Expert** Badge.
- Speaker at 4 conferences.
